

Full Project Report mychitti-main

Generated: 2 March 2026 | Platform: Laravel 10 | Type: Multi-Vendor SaaS Marketplace

1. Project Overview

mychitti-main is a large-scale, multi-vendor SaaS marketplace platform built on **Laravel 10**. It supports multiple business verticals (food delivery, grocery, pharmacy, parcel, eCommerce, services) all within a single codebase, distinguished by a **zone + module** architecture. It includes portals for Admins, Vendors/Stores, Delivery Men, and Customers, exposed via both a web panel and a REST API layer.

2. Technology Stack

Layer	Technology
Backend Framework	Laravel 10 (PHP ^7.3 / ^8.1)
Database	MySQL (via Eloquent ORM + Spatial support)
Authentication	Laravel Passport (OAuth2), Firebase JWT
Real-time	Laravel WebSockets (Pusher-compatible), Pusher PHP Server
File Storage	Local disk, AWS S3 (Flysystem v3), Cloudflare R2
Task Queue	Sync (configurable) / Laravel Queues
Email	SMTP via Laravel Mail + 30+ email templates
Package Manager	Composer (PHP), npm (JS/CSS assets)
Bundler	Laravel Mix (webpack.mix.js)
Geospatial	matanyadaev/laravel-eloquent-spatial
PDF Generation	mPDF
Excel Import/Export	Maatwebsite Excel, Rap2hpoutre Fast Excel
Image Processing	Intervention Image
CAPTCHA	Gregwar CAPTCHA
Module System	nwidart/laravel-modules

3. Architecture

3.1 Folder Structure

3.2 Multi-Portal System

Portal	Route File	Controllers
Admin Panel	[routes/admin.php](file:///d:/Work%20Projects/mychitti-main/routes/admin.php)	Http/Controllers/Admin/ (88 files)

Portal	Route File	Controllers
Vendor Panel	[routes/vendor.php](file:///d:/Work%20Projects/mychitti-main/routes/vendor.php)	Http/Controllers/Vendor/ (78 files)
Vendor Employee	[routes/vendor_employee.php](file:///d:/Work%20Projects/mychitti-main/routes/vendor_employee.php)	Shared with Vendor
REST API	routes/api/	Http/Controllers/Api/ (52 files)
Public Web	routes/web.php	Http/Controllers/Front/ (13 files)
Install Wizard	routes/install.php	InstallController.php

4. Core Features

4.1 Order & Delivery Management

- Full order lifecycle: placement acceptance preparation delivery completion
- Order types: standard, parcel, prescription/pharmacy, POS, guest orders
- Delivery man assignment, tracking, history, and vehicle management ([DMVehicle](#))
- Order refund system with configurable refund reasons
- Partial payment support, service charge, tips, cutlery options
- Real-time order delivery history tracking

4.2 Store / Vendor Management

- Multi-store, multi-zone setup
- Store scheduling, shifts, holidays, holiday overrides
- Store galleries, documents, signatures, announcements
- Vendor subscriptions & subscription plan requests
- Store wallets, daily balance, bank accounts & transactions
- Vendor ledger entries, store accounts, disbursements
- Store teams and team members

4.3 Product / Menu Item Management

- Hierarchical categories with slugs, SEO, banners
- Items with variations, add-ons, attributes, tags, FAQs, area keywords
- Flash sales and item campaigns
- Pharmacy-specific item details

-
- Bulk item import/export (Excel)
 - Temp product staging system

4.4 Customer Management

- User registration, social login ([laravel/socialite](#)), phone verification
- Customer wallet, loyalty points, referral code system
- Wishlists, cart management (database-persisted), recent searches
- Customer addresses with geospatial support
- Guest checkout support

4.5 Marketing & Promotions

- Coupon system (admin + vendor created)
- Flash sales (global & store-level)
- Item campaigns, campaign stores
- Wallet bonuses (configurable rules)
- Offer banners, module-wise banners
- Admin promotional banners, testimonials, admin features/criteria

4.6 Reporting & Analytics

- Large [ReportController.php](#) (~188 KB) covering:
 - Revenue reports, order reports, expense reports
 - Delivery man reports, disbursement reports
 - Loyalty point reports, wallet reports
 - Sales statistics, store-wise analytics
- DashboardController with comprehensive KPI aggregation (~74 KB)
- Excel export for most report types

4.7 Zone & Module System

- Geographic zones with polygon-based boundaries
- Module types (food, grocery, pharmacy, parcel, eCommerce, shops)
- Module-zone assignments, zone-based payment method toggles
- Maximum COD order amount per zone
- Module-wise banners, why-choose sections

4.8 POS (Point of Sale)

- [POSController.php](#) (~38 KB) for in-store orders
- POS tokens and POS token items
- Integrated with the order pipeline

4.9 Inventory Management

- Inventory items, orders, order details, gate passes
- Branch inventory, inventory reports, supply orders

-
- Storage units, purchase orders, return purchase slips

4.10 HR / Employee Management

- Attendance tracking, time cards
- Salary management, leave management
- Employee roles, temporary employees
- Advance requests, gate passes (employee)
- Holiday management, department management

4.11 Accounting & Finance

- Ledger accounts and account types
- Accounts, account transactions, account detail options
- Day books, cash books, expenses
- Manual invoices, invoice items, invoice configuration
- Receivable receipts, disbursements, withdrawal methods

4.12 Lead & Service Management

- [LeadOrder](#), [LeadOrderDetail](#), [LeadStatus](#), [LeadsDistribution](#)
- Service requests, service invoices, accepted service requests
- Quotations, quotation details, service coupons
- Service notifications, service reports
- Common service issues, in-service quotations

4.13 Conversations & Messaging

- Real-time chat via WebSockets
- Conversations between users and vendors
- Message model with file support
- [ConversationController](#) in admin panel

4.14 Website / CMS Settings

- [BusinessSettingsController.php](#) (~330 KB) master settings controller
- Blog system (BlogCategory, BlogPost)
- SEO content, social media links, newsletter
- Contact forms, react/flutter special criteria
- [claudeai_webpage_settings/](#) UI config for Claude AI landing pages
- [sitemap.xml](#) (42 KB)

4.15 Notification System

- Database notifications (UserNotification, InAppNotification, ServiceNotification)
- Push notifications via Firebase ([firebase-messaging-sw.js](#), [service-account-key.json](#))
- Notification messages and templates

4.16 Multi-language Support

- `LanguageController`, `Translation` model
- `app/Utils/language.php` utilities
- `current_language_key` stored per user

5. AI & Intelligent Features

5.1 AI Chat System

- `AIChatMessage` model (messages stored per admin, with summarization flag)
- `Summary` model (rolling message summaries for memory efficiency)
- `AdminMemory` model (persistent key-value memory per admin)
- `AIChatController` in the admin panel

5.2 AI Services

Service	File	Description
<code>ClaudeService</code>	<code>Services/ClaudeService.php</code>	Anthropic Claude API integration (8 KB)
<code>OpenAIService</code>	<code>Services/OpenAIService.php</code>	OpenAI API integration (7.7 KB)
<code>AIServiceClient</code>	<code>Services/AIServiceClient.php</code>	Generic AI client abstraction (5.6 KB)
<code>MemoryService</code>	<code>Services/MemoryService.php</code>	Context memory management (7.6 KB)

5.3 Agent System

- `AgentFactory`, `AgentTask`, `AgentFunction`, `AgentRunLog`, `AgentVersion`, `AgentApiTool` models
- `AIAgentSkillController.php` in Admin (~12 KB)
- Agent Tasks, Function Registration, Run Logging

5.4 System Prompts

- `SystemPrompt` model (3.2 KB)
- `SystemPromptController.php` for managing admin-side AI system prompts
- `AiProvider` model for multi-provider support

6. Payment Gateways

Gateway	Controller
PayPal	PaypalPaymentController.php
Stripe	StripePaymentController.php
Razorpay	RazorPayController.php
Flutterwave	FlutterwaveV3Controller.php
Paystack	PaystackController.php
Bkash	BkashPaymentController.php
Paytm	PaytmController.php
Paymob	PaymobController.php
Paytabs	PaytabsController.php
MercadoPago	MercadoPagoController.php
LiqPay	LiqPayController.php
SenangPay	SenangPayController.php
SslCommerz	SslCommerzPaymentController.php
Xendit	via xendit/xendit-php package
Offline Payments	OfflinePaymentMethodController.php
Wallet Payments	WalletPayment model

16 payment methods supported (online + offline + wallet)

7. Database Overview

7.1 Migration Timeline

- **131 total migrations** from [2022-03](#) to [2026-02](#)
- Active development through early 2026

7.2 Key Table Groups

Group	Tables (examples)
Users & Auth	users, admins, vendor_employees, delivery_men, guests, phone_verifications

Group	Tables (examples)
Orders	orders, order_details, order_transactions, order_payments, order_cancel_reasons, order_references
Items	items, item_campaigns, flash_sales, flash_sale_items, add_ons, attributes, tags
Stores	stores, store_configs, store_schedules, store_wallets, store_teams
Zones & Modules	zones, modules, module_zones, module_wise_banners
Payments	wallet_transactions, offline_payments, disbursements, withdraw_requests
AI	a_i_chat_messages, summaries, admin_memories, agent_tasks, agent_functions, agent_run_logs, agent_versions, agent_api_tools
HR / Finance	attendance, salaries, leaves, expenses, account_transactions, day_books
Inventory	inventory_items, inventory_orders, inventory_gatepasses, supply_orders
CMS	business_settings, banners, data_settings, email_templates, seo_contents
Communication	conversations, messages, notifications, user_notifications

8. Key Configuration Files

File	Purpose
<code>composer.json</code>	PHP dependencies (38 packages)
<code>package.json</code>	JS/CSS build dependencies
<code>webpack.mix.js</code>	Laravel Mix asset compilation
<code>phpunit.xml</code>	PHPUnit test configuration
<code>.htaccess</code>	Apache URL rewriting rules
<code>.env</code> / <code>.env.example</code>	Environment configuration

File	Purpose
config/ (28 files)	App, cache, database, mail, queue, websockets configs
modules_statuses.json	nwidart module enable/disable status
firebase-messaging-sw.js	Firebase push notification service worker
service-account-key.json	Firebase service account credentials

9. Autoloaded Helper Files

The following files are autoloaded globally via [composer.json](#):

File	Domain
app/CentralLogics/banner.php	Banner logic
app/CentralLogics/category.php	Category logic
app/CentralLogics/campaign.php	Campaign logic
app/CentralLogics/item.php	Item/product logic
app/CentralLogics/store.php	Store logic
app/CentralLogics/helpers.php	General helpers
app/CentralLogics/customer.php	Customer logic
app/CentralLogics/order.php	Order logic
app/CentralLogics/coupon.php	Coupon logic
app/CentralLogics/sms_module.php	SMS helpers
app/CentralLogics/filemanager.php	File manager helpers
app/helpers.php	Global helpers (~190 KB)
app/Library/Constants.php	App constants
app/Library/Responses.php	API response helpers
app/Utills/language.php	Language utilities
app/Utills/settings.php	Settings utilities
app/Utills/constant.php	Utility constants

10. Middleware Layer (35 Middleware)

Managed via [app/Http/Kernel.php](#). Includes custom middleware for:

- Admin, Vendor, and Delivery Man authentication guards
- API token validation
- Locale / language switching
- Role-based access control

11. Scheduled Jobs & Commands

- [app/Console/](#) has **7 command files**
- [CronController.php](#) (~40 KB) handles complex cron-driven business logic
- Jobs: 7 queue job classes (email, notifications, AI processing)

12. Testing

Asset	Detail
Test Framework	PHPUnit ^10.0
Test Directory	tests/ (4 files)
Config	phpunit.xml
Dev Tools	barryvdh/laravel-debugbar , spatie/laravel-ignition

Testing coverage is minimal; the project primarily relies on manual/integration testing.

13. Deployment Notes

- [code_backup.sh](#) Script to backup codebase
- [db_backup.sh](#) Script to backup database
- [cloudflare_r2_setup.php](#) Cloudflare R2 setup helper
- [installation/](#) Self-hosted installation wizard (13 files)
- [.github/](#) GitHub Actions CI/CD workflows
- [php.ini](#) / [.user.ini](#) Server PHP config overrides
- [robots.txt](#), [sitemap.xml](#) SEO assets

14. Highlights & Scale

Metric	Count
PHP Models	250+
Database Migrations	131
Controllers	262 (across all portals)
Admin Controllers	88
Vendor Controllers	78
API Controllers	52
Services	20
Middleware	35
Mail Classes	30
Excel Export Classes	82
Payment Gateways	16
Route Files	16+
Public Assets	2,491 files
Resources (views/JS/CSS)	1,182 files

15. Summary

mychitti-main is a production-grade, enterprise-level multi-vendor marketplace platform. Its key differentiators include:

- **Multi-module business verticals** (food, grocery, pharmacy, parcel, eCommerce, services)
- **Multi-zone geographic delivery** with polygon-based zone boundaries and spatial queries
- **16 payment gateways** for global market coverage
- **Built-in AI chat & agent system** using Claude and OpenAI APIs, with memory and summary management
- **Comprehensive admin + vendor + delivery man portals** with role-based access control
- **Full HR, Inventory, and Accounting modules** within the same platform
- **SaaS-ready** with vendor subscription management, plan billing, and installation wizard
